

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A method comprising the steps of:
 - (a) receiving at an Identity System a request for a certificate related action for a user; and
 - (b) retrieving by the Identity System a workflow for responding to said request from a set of workflows, wherein said set of workflows includes a plurality of workflows for responding to said certificate related action and wherein each workflow in said plurality of workflows corresponds to a different set of characteristics for a user and wherein said workflow for responding to said request corresponds to said certificate related action and a set of characteristics for said user from an identity profile maintained by the Identity System and including a user type.
2. (Canceled)
3. (Previously Presented) The method of claim 1, wherein a first workflow in said plurality of workflows contains a first set of directives and a second workflow in said plurality of workflows contains a second set of directives, wherein said first set of directives is different from said second set of directives.
4. (Original) The method of claim 3, wherein said certificate related action is a certificate enrollment action, wherein said first workflow in said plurality of workflows calls for obtaining an approval before issuing a certificate and wherein said second workflow in said plurality of workflows does not call for obtaining an approval before issuing a certificate.

5. (Original) The method of claim 3, wherein said certificate related action is a certificate renewal action, wherein said first workflow in said plurality of workflows calls for retrieving an approval before renewing a certificate and wherein said second workflow in said plurality of workflows does not call for retrieving an approval before renewing a certificate.

6. (Original) The method of claim 3, wherein said certificate related action is a certificate revocation action.

7. (Original) The method of claim 3, further including the step of:

(c) receiving said plurality of workflows.

8. (Original) The method of claim 1, wherein said method further includes the step of:

(d) performing said workflow, wherein said step (d) includes the steps of:

(1) retrieving an approval response; and

(2) obtaining a certificate.

9. (Original) The method of claim 8, further including the steps of:

(e) receiving a second request for a second certificate related action for a second user;

(f) retrieving a second workflow for responding to said second request from said set of workflows, wherein said second workflow corresponds to said second certificate related action and a set of characteristics for said second user; and

(g) performing said second workflow, wherein said step (g) includes the step of:

(1) obtaining a second certificate without retrieving an approval response.

10. (Original) The method of claim 9, wherein said certificate related action is a certificate enrollment action and said second certificate related action is a certificate enrollment action.

11. (Original) The method of claim 9, wherein said certificate related action is a certificate renewal action and said second certificate related action is a certificate renewal action.

12. (Original) The method of claim 1, further including the step of:

(h) performing said workflow, wherein said certificate related action is a certificate enrollment action and wherein said step (h) includes the step of:

(1) obtaining a certificate, wherein said step (h)(1) includes the steps of

- (i) authenticating said user;
- (ii) forwarding said request to a Certificate Processing Server;
- (iii) receiving said certificate; and
- (iv) storing said certificate.

13. (Original) The method of claim 1, further including the step of:

(j) performing said workflow, wherein said certificate related action is a certificate renewal action and wherein said step (j) includes the step of:

(1) obtaining a certificate renewal, wherein said step (j)(1) includes the steps of:

- (i) authenticating said user;
- (ii) forwarding said request to a Certificate Processing Server;
- (iii) receiving a certificate renewal acknowledgement.

14. (Original) The method of claim 1, further including the step of:

(k) performing said workflow, wherein said certificate related action is a certificate revocation action and wherein said step (k) includes the step of:

(1) revoking a certificate, wherein said step (k)(1) includes the steps of:

(i) authenticating said user; and

(ii) forwarding said request to a Certificate Processing Server.

15. (Canceled)

16. (Previously Presented) One or more processor readable storage devices having processor readable code embodied on said processor readable storage devices, said processor readable code for programming one or more processors to perform a method comprising the steps of:

(a) receiving at an Identity System a request for a certificate related action for a user; and

(b) retrieving by the Identity System a workflow for responding to said request from a set of workflows, wherein said set of workflows includes a plurality of workflows for responding to said certificate related action and wherein each workflow in said plurality of workflows corresponds to a different set of characteristics for a user and wherein said workflow for responding to said request corresponds to said certificate related action and a set of characteristics for said user from an identity profile maintained by the Identity System and including a user type.

17. (Canceled)

18. (Previously Presented) One or more processor readable storage devices according to claim 16, wherein a first workflow in said plurality of workflows contains a first set of directives and a second workflow in said plurality of workflows contains a second set of directives, wherein said first set of directives is different from said second set of directives.

19. (Original) One or more processor readable storage devices according to claim 18, wherein said certificate related action is a certificate enrollment action, wherein said first workflow in said plurality of workflows calls for obtaining an approval before issuing a certificate and wherein said second workflow in said plurality of workflows does not call for obtaining an approval before issuing a certificate.

20. (Original) One or more processor readable storage devices according to claim 18, wherein said method further includes the step of:

(c) receiving said plurality of workflows.

21. (Original) One or more processor readable storage devices according to claim 16, wherein said method further includes the steps of:

(d) performing said workflow, wherein said step (d) includes the steps of:

(1) retrieving an approval response; and

(2) obtaining a certificate;

(e) receiving a second request for a second certificate related action for a second user;

(f) retrieving a second workflow for responding to said second request from said set of workflows, wherein said second workflow corresponds to said second certificate related action and a set of characteristics for said second user; and

(g) performing said second workflow, wherein said step (g) includes the step of:

(1) obtaining a second certificate without retrieving an approval response.

22. (Original) One or more processor readable storage devices according to claim 21, wherein said certificate related action is a certificate enrollment action and said second certificate related action is a certificate enrollment action.

23. (Original) One or more processor readable storage devices according to claim 16, wherein said method further includes the step of:

(h) performing said workflow, wherein said certificate related action is a certificate enrollment action and wherein said step (h) includes the step of:

(1) obtaining a certificate, wherein said step (h)(1) includes the steps of:

- (i) authenticating said user;
- (ii) forwarding said request to a Certificate Processing Server;
- (iii) receiving said certificate; and
- (iv) storing said certificate.

24. (Previously Presented) One or more processor readable storage devices according to claim 16, wherein said method further includes the step of:

(j) performing said workflow, wherein said certificate related action is a certificate renewal action and wherein said step (j) includes the step of:

(1) obtaining a certificate, wherein said step (j)(1) includes the steps

- (i) authenticating said user;
- (ii) forwarding said request to a Certificate Processing Server;
- (iii) receiving a certificate renewal acknowledgement.

and

25. (Original) One or more processor readable storage devices according to claim 16, wherein said method further includes the step of:

(k) performing said workflow, wherein said certificate related action is a certificate revocation action and wherein said step (k) includes the step of:

(1) revoking a certificate, wherein said step (k)(1) includes the steps of:

(i) authenticating said user; and

(ii) forwarding said request to a Certificate Processing Server.

26. (Canceled)

27. (Previously Presented) An apparatus comprising:
one or more communications interfaces;
one or more storage devices; and

one or more processors in communication with said one or more storage devices and said one or more communication interfaces, said one or more processors perform a method comprising the steps of:

(a) receiving at an Identity System a request for a certificate related action for a user; and

(b) retrieving by the Identity System a workflow for responding to said request from a set of workflows, wherein said set of workflows includes a plurality of workflows for responding to said certificate related action and wherein each workflow in said plurality of workflows corresponds to a different set of characteristics for a user and wherein said workflow for responding to said request corresponds to said certificate related action and a set of characteristics for said user from an identity profile maintained by the Identity System and including a user type.

28. (Canceled)

29. (Previously Presented) The apparatus of claim 27, wherein a first workflow in said plurality of workflows contains a first set of directives and a second workflow in said plurality of workflows contains a second set of directives, wherein said first set of directives is different from said second set of directives.

30. (Original) The apparatus of claim 29, wherein said certificate related action is a certificate enrollment action, wherein said first workflow in said plurality of workflows calls for obtaining an approval before issuing a certificate and wherein said second workflow in said plurality of workflows does not call for obtaining an approval before issuing a certificate.

31. (Previously Presented) The apparatus of claim 29, wherein said method further includes the step of:

(c) receiving said plurality of workflows.

32. (Previously Presented) The apparatus of claim 27, wherein said method further includes the steps of:

(d) performing said workflow, wherein said step (d) includes the steps of:

(1) retrieving an approval response; and

(2) obtaining a certificate;

(e) receiving a second request for a second certificate related action for a second user;

(f) retrieving a second workflow for responding to said second request from said set of workflows, wherein said second workflow corresponds to said second certificate related action and a set of characteristics for said second user; and

(g) performing said second workflow, wherein said step (g) includes the step of:

(1) obtaining a second certificate without retrieving an approval

response.

33. (Original) The apparatus of claim 32, wherein said certificate related action is a certificate enrollment action and said second certificate related action is a certificate enrollment action.

34. (Original) The apparatus of claim 27, wherein said method further includes the step of:

(h) performing said workflow, wherein said certificate related action is a certificate enrollment action and wherein said step (h) includes the step of:

(1) obtaining a certificate, wherein said step (h)(1) includes the steps of:

- (i) authenticating said user;
- (ii) forwarding said request to a Certificate Processing Server;
- (iii) receiving said certificate; and
- (iv) storing said certificate.

35. (Original) The apparatus of claim 27, wherein said method further includes the step of:

(j) performing said workflow, wherein said certificate related action is a certificate renewal action and wherein said step (j) includes the step of:

(1) obtaining a certificate, wherein said step (j)(1) includes the steps

of:

- (i) authenticating said user;
- (ii) forwarding said request to a Certificate Processing Server;

and

(iii) receiving a certificate renewal acknowledgement.

36. (Original) The apparatus of claim 27, wherein said method further includes the step of:

(k) performing said workflow, wherein said certificate related action is a certificate revocation action and wherein said step (k) includes the step of:

(1) revoking a certificate, wherein said step (k)(1) includes the steps of:

(i) authenticating said user; and

(ii) forwarding said request to a Certificate Processing Server.

37. (Canceled)

38. (Original) A method comprising the steps of:

(a) receiving a request for a certificate related action for a user; and

(b) retrieving a workflow for responding to said request from a set of workflows,

wherein said workflow corresponds to said certificate related action and a set of characteristics for said user,

wherein said set of workflows includes a plurality of workflows for responding to said certificate related action, and

wherein each workflow in said plurality of workflows corresponds to a different set of characteristics for a user.

39. (Original) The method of claim 38, further including the step of:

(c) receiving said plurality of workflows.

40. (Original) The method of claim 38, wherein said method further includes the steps of:

(d) performing said workflow, wherein said step (d) includes the steps of:

(1) retrieving an approval response; and

(2) obtaining a certificate;

(e) receiving a second request for a second certificate related action for a second user;

(f) retrieving a second workflow for responding to said second request from said set of workflows, wherein said second workflow corresponds to said second certificate related action and a set of characteristics for said second user; and

(g) performing said second workflow, wherein said step (g) includes the step of:

(1) obtaining a second certificate without retrieving an approval response.

41. (Original) The method of claim 40, wherein said certificate related action and said second certificate related action call for the same certificate related action.

42. (Original) The method of claim 40, wherein said steps (a), (b), (d), (e), (f), and (g) are performed by an Identity System in communication with an Access System.

43. (Original) One or more processor readable storage devices having processor readable code embodied on said processor readable storage devices, said processor readable code for programming one or more processors to perform a method comprising the steps of:

(a) receiving a request for a certificate related action for a user; and

(b) retrieving a workflow for responding to said request from a set of workflows,

wherein said workflow corresponds to said certificate related action and a set of characteristics for said user,

wherein said set of workflows includes a plurality of workflows for responding to said certificate related action, and

wherein each workflow in said plurality of workflows corresponds to a different set of characteristics for a user.

44. (Original) One or more processor readable storage devices according to claim 43, wherein said method further includes the step of:

(c) receiving said plurality of workflows.

45. (Original) One or more processor readable storage devices according to claim 43, wherein said method further includes the steps of:

(d) performing said workflow, wherein said step (d) includes the steps of:

(1) retrieving an approval response; and

(2) obtaining a certificate;

(e) receiving a second request for a second certificate related action for a second user;

(f) retrieving a second workflow for responding to said second request from said set of workflows, wherein said second workflow corresponds to said second certificate related action and a set of characteristics for said second user; and

(g) performing said second workflow, wherein said step (g) includes the step of:

- (1) obtaining a second certificate without retrieving an approval response.

46. (Original) One or more processor readable storage devices according to claim 45, wherein said certificate related action and said second certificate related action call for the same certificate related action.

47. (Original) One or more processor readable storage devices according to claim 45, wherein said steps (a), (b), (d), (e), (f), and (g) are performed by an Identity System in communication with an Access System.

48. (Original) An apparatus comprising:

one or more communications interfaces;

one or more storage devices; and

one or more processors in communication with said one or more storage devices and said one or more communication interfaces, said one or more processors perform a method comprising the steps of:

- (a) receiving a request for a certificate related action for a user; and

- (b) retrieving a workflow for responding to said request from a set of

workflows,

wherein said workflow corresponds to said certificate related action and a set of characteristics for said user,

wherein said set of workflows includes a plurality of workflows for responding to said certificate related action, and

wherein each workflow in said plurality of workflows corresponds to a different set of characteristics for a user.

49. (Original) The apparatus of claim 48, wherein said method further includes the step of:

- (c) receiving said plurality of workflows.

50. (Original) The apparatus of claim 48, wherein said method further includes the steps of:

- (d) performing said workflow, wherein said step (d) includes the steps of:

- (1) retrieving an approval response; and

- (2) obtaining a certificate;

- (e) receiving a second request for a second certificate related action for a second user;

- (f) retrieving a second workflow for responding to said second request from said set of workflows, wherein said second workflow corresponds to said second certificate related action and a set of characteristics for said second user; and

- (g) performing said second workflow, wherein said step (g) includes the step of:

- (1) obtaining a second certificate without retrieving an approval response.

51. (Original) The apparatus of claim 50, wherein said certificate related action and said second certificate related action call for the same certificate related action.

52. (Original) The apparatus of claim 50, wherein said steps (a), (b), (d), (e), (f), and (g) are performed by an Identity System in communication with an Access System.
